FOR IMMEDIATE RELEASE – RecordMax New Orleans Upgrades Internal and Customer Management Systems.

February 15th, 2008 – New Orleans, Louisiana

RecordMax of New Orleans is pleased to announce upgrades to our primary business systems, adding numerous operational and customer focused enhancements as well as the launch of a new personalized web interface for real-time online access to customer's physical information assets.

Primary Operating Systems Enhancements

In sticking with it's commitment to maintain and implement the most current technologies for it's customers, RecordMax has formally upgraded it's primary operating systems during the month of February with numerous new features and benefits. Systems have now been assured as compatible with Microsoft™ VISTA™ by our Microsoft™ Gold Certified Development Partners. Being VISTA compatible assures easy implementation of new workstations and other desktop and server computing. Changes and enhancements to Workorder functionality (the processes and paperwork associated with customer service requests) includes new security features, new audit trail features, and new communications tools for customer control of delivery addresses and inventory status information.

Customer Online Access Interface Enhancements

RecordMax assures that customers can get real-time access to the physical information assets stored within our secure facilities. A new personalized web interface upgrade offers customers the ability to add and edit metadata (the descriptive index associated with paper documents or other records) either one at a time or globally; you can request items to be picked up or delivered with a powerful external list posting capability to dovetail with your internal databases; request supplies, labels or new containers; export tables of data to other tools like Excel™; you can personalize field descriptions and other interface language…either to your specific vertical (like healthcare or legal) as well as to other languages including French, Spanish, German, etc.; and you can control, add or edit users to the system including controlling security, access and functionality levels.

For more information about our systems and for a free demonstration of our customer interface, please contact New Orleans business development representative Gary Cooper at 504-363-4110 or send Gary an email at gcooper@recordmax.com.

About RecordMax

RecordMax is a proven leader in providing secure information storage and management services to law firms, hospitals, business professionals, government entities and other professional organizations.
