

FOR IMMEDIATE RELEASE – RecordMax Mobile Adds Real Estate, Racking and Customers

May 1st, 2008 – Mobile, Alabama

RecordMax Mobile, LLC recently signed a deal with landlord Paulk Properties, LLC of Mobile, Alabama to increase the amount of secure space used by **RecordMax** within a long term lease for the company's records storage, data storage and information services customers in South Alabama.

The agreement, executed last month by **RecordMax** USA President Jim Teske and Paulk Properties President Robert Paulk, was fundamentally anticipated when the two signed an agreement under which **RecordMax** acquired Mr. Paulk's records management assets in Mobile about a year ago. "While we had hoped to expand our lease with Robert when we did our deal last year, we had to officially both grow into making the need a reality as well as have a level of confidence about continued growth in the Mobile marketplace" said Teske. "As far as growth is concerned, it's been very nice. We've added some huge customers and a number of smaller ones...just the way I like it...in a digestible manner where we can assure delivery on expectations" he added. "We were fortunate to acquire South Alabama's largest commercial archive facility last year and we are working really hard to build on top of the reputation Gloria (long time Operations Manager Gloria Hayes) has earned with our customers."

New clients have recently come aboard with various service needs including traditional paper document storage and retrieval, tape rotation and document shredding. Local **RecordMax** representative Carter Mills recently added one customer where he had to work with both national information technology managers as well as with local union workers in implementation of a back-up tape rotation program. Another new customer for data protection is a major hospital where the IT function is outsourced to a multi-national technology company. And another new client is a small business, which although small, still seems to understand the importance and benefits of implementing a new security container program in today's environment of identity and data theft.

The additional real estate is being filled up with new shelving systems provided by REB Storage Systems. REB is a leading expert in shelving systems design and implementation for records centers and other storage companies that has worked with **RecordMax** for years. Once the install is complete, including new state-of-the-art SnapDeck aluminum metal decking, racking will receive barcode labels identifying the exact position on each shelf where information assets will reside.

About The RecordMax Companies

RecordMax is a proven leader in providing secure information storage and management services to law firms, hospitals, businesses, government entities and other professional organizations. Our archival services range from the protection of business records, files, computer tapes and other sensitive media to digital storage of electronic documents, images, email and web content.
