

FOR IMMEDIATE RELEASE – RecordMax Rolls Out Localized Imaging Services in Chattanooga Facilities.

May 10th, 2008 – Chattanooga, Tennessee

The **RecordMax**® Companies announced the formal addition of image capture, indexing and other electronic document management services directly out of its local Chattanooga data storage facility (centrally located just outside of downtown Chattanooga, Tennessee). The installation of new Dell® Computers; Digitech Systems® software and Kodak® Desktop scanners, intended to serve customers in Greater Chattanooga and surrounding areas, are part of an ongoing company-wide rollout of digital document solutions into each local market served.

A new customer relationship facilitated an opportunity to start the new services under the best possible circumstances. “We’ve begun a long term scanning project in Chattanooga for an organization with dozens of locations here in the Southeast...handling tens of thousands of records while adding the right automated indexing solution for their specific needs” offered **RecordMax** USA President Jim Teske. “They have a medium to high volume requiring fairly quick turnaround every month. That fits with our desire to have a recurring business relationship that helps pay for some significant upfront investments. In a recent meeting, the customer shared their enthusiasm and appreciation for being able to immediately access any document down to a specific page with faster and easier access (using our services) than had been the case previously.”

Walter Reid, who coordinates imaging service operations in Jackson, Mississippi for **RecordMax**, made a trip to Chattanooga to coordinate installation of new equipment and training of Chattanooga team members. Rotating job responsibilities assured maximum cross training benefits while also giving people a chance to review each other’s work and assure reinforcement of processes and procedures. Justin Battles, a mechanical engineering student at UTC that has been with us from day one in Chattanooga, will be the primary local imaging services coordinator.

Contact Joan Kile at (423) 643-3561 or via email at jkile@recordmax.com for more information on image capture, document indexing, digital archiving or our other traditional records and data storage solutions in Southeast Tennessee, Northeast Georgia and Northwest Alabama.
