

***FOR IMMEDIATE RELEASE – RecordMax Adds New Telecommunications Infrastructure and Additions to Our Family of Strategic Vendors***

**December 16<sup>th</sup>, 2008 – Jackson, MS; New Orleans, LA; Mobile, AL; Chattanooga, TN**

The **RecordMax Companies** are excited to announce a new telecommunications infrastructure designed to integrate various high speed network technologies; with hosted exchange and voicemail systems, enhanced online access solutions and new disaster recovery capabilities.

“The new program is really a collaboration of efforts...I’ve been working in recent months on hosted exchange solutions to connect our people internally and my partner Jim has been focused on high speed lines and connectivity with customers” stated company CEO Bob Lloyd. “I’m excited to be at the point of implementation and hope customers see the benefits asap” Lloyd added.

**Hosted VoIP Exchange Delivers Flexibility and Connectivity**

An exhaustive search led Bob to choose Broadband Voice LLC ([www.bb-voice.com](http://www.bb-voice.com)) of Jackson, Mississippi as the project leaders for rolling out a VoIP, hosted exchange & voicemail solution for all RecordMax & StorageMax locations. VoIP (internet protocol telephony) increases the speed & efficiency of making contact and delivering valuable information to clients & colleagues: creates a remote environment to support initiatives such as telecommuting; provides single number access to voice mails, faxes and emails through unified messaging and Find Me / Follow Me features; and offers integration with web-based contact manager software which provides ‘Click-to-talk’ access solutions & other advanced features.

**New Speedy Online Connectivity**

Another focus for RecordMax management has been to enhance the connectivity with customers. The focus has been for 1) enhanced connectivity via movement of data between customer databases & RecordMax databases; 2) faster connectivity via direct but secure access into RecordMax databases for real time updates, online ordering & metadata editing for items in storage & under our care; and 3) faster connectivity for movement of images and digital documents via email; ftp; or other method. The new roll out is based on partnerships with providers that include AT&T; Cavalier Business; Charter Communications; & Cox Business Services delivering new T1 data or high speed cable pipelines (adding enhanced upload and/or download speeds and enhanced redundancy between multiple carriers).

***About The RecordMax Companies***

**RecordMax** is a proven leader in providing secure information storage, retrieval, imaging, shredding & data protection services to law firms, hospitals, businesses, government entities or other professional organizations. Our archival services range from protecting business records, files, computer tapes and other sensitive media to offering digital storage of electronic documents, images, email & web content.
