

**FOR IMMEDIATE RELEASE – RecordMax Implementing New
Technology for Protection of Client Assets & Fleet Productivity**

December 30th, 2009 – Jackson, MS

The RecordMax Companies are excited to announce that they have signed off on a new partnership for global positioning, vehicle tracking and fleet maintenance.

RecordMax completed a deal in late December with Teletrac, Inc (based out of Garden Grove, California) to install Teletrac vehicle locator hardware and implement Teletrac Fleet Director software in all company vehicles and company offices beginning early next month.

“This solution enhances the security and protection of all customer assets under our care while also enhancing the productivity and longevity of our fleet of vehicles” offered Jim Teske, President of The *RecordMax* Companies. “We reviewed a number of products, talked to other similar service providers across the country and assured we were doing our homework in choosing a premier GPS business partner. Teletrac has over 500 employees ensuring a very high level of service and support. They offer in-house software development and manufacturing of all software and hardware; which means no finger pointing at external partners if there’s ever a bump in the road. They’ve been doing this for over 20 years and have built a track record of success. And they’re backed by a publicly traded international parent company for an even higher level of stability and resources” added Teske.

About Teletrac

For more than 20 years, Teletrac has remained focused on its mission: to deliver intelligent driving solutions to help our customers and their employees get the most out of every operational dollar spent by making better use of fleets, improving driver productivity, and cutting costs while enhancing end-user service. Teletrac serves more than 6000 customers managing 90,000 vehicles, delivering compelling value in four key market segments: services, trucking, transportation and distribution. The Fleet Director platform offers a wide selection of interchangeable software modules and components such as real-time, GPS-based automated vehicle tracking/reporting, Turn-By-Turn navigation with real-time traffic information, Alert/Exception notifications, electronic Hours-Of-Service with in-cab viewing of driver status and history, electronic fuel tax data and onboard engine and vehicle diagnostics. For more information, go to www.teletrac.net.

About The RecordMax Companies

RecordMax is a proven leader in providing secure information storage, retrieval, imaging, shredding & data protection services to law firms, hospitals, businesses, government entities or other professional organizations.
