

***FOR IMMEDIATE RELEASE – RecordMax Continues Expansion of Digital Service Division***

**September 1<sup>st</sup>, 2011 – Jackson, MS; Chattanooga, TN; Mobile, AL; New Orleans, LA**

**RecordMax** continues to grow and expand in both the numbers of customers served as well as the overall volume of services provided. Consistent with efforts started a number of years ago, growth in imaging & digital solutions remains on target as an increasing portion of RecordMax revenues.

Back in 2007, RecordMax partnered with Digitech Systems, Kodak and Fujitsu with a focus of providing customers with the best in software technology as well as scanning hardware. Another partner was added in 2009 in IBML, which excels in providing world leading technology for high volume scanning and sorting requirements. Recent software enhancements include migration to Digitech's PaperVision Capture solutions from older versions of PaperFlow.

Since entering the digital field, RecordMax has handled an increasing number of projects in size and scope across the vertical market spectrum. Customers include major healthcare providers, law firms, engineers and government entities. One recent project served as the catalyst for bringing a network of 19 clinics into the digital age through the capture & integration of over 3,000,000 pages of patient information. Another project involves the ongoing scanning of accounting information and financial records for one of the Southeast's largest new manufacturing operations. And a recent relationship with a well known law firm client brings scanning over 1,200,000 legal documents that must be retained over the long term and may potentially require frequent and prompt access. Additional ongoing imaging and digital services projects include film to image migrations, conversion of education transcripts as well as other projects for healthcare and the legal field.

Playing an increasing management role in our digital services division is Barbara Coppock, CDIA+. A Certified Document Imaging Architect, Barbara is also a longtime member of ARMA International. She has been traveling extensively across the Southeast meeting with customers and assisting with digital implementations in New Orleans, Mobile and Chattanooga. Barbara has specific hands on experience managing projects across the digital spectrum: film and fiche conversions; small and large paper-to-electronic document migrations; various post processing projects on scanned images; document management systems; digital archive solutions; match merge file indexing & integration; software & hardware systems implementation; etc. Her article "The Age of Electronic Health Records" is now available at [www.recordmax.com/education.html](http://www.recordmax.com/education.html).

***About The RecordMax Companies***

RecordMax is a proven leader in providing secure information storage, retrieval, imaging, shredding & data protection services to law firms, hospitals, businesses, government entities or other professional organizations. Our archival services range from protecting business records, files, computer tapes and other sensitive media to offering digital storage of electronic documents, images, email & web content. Enjoy convenient, professional delivery and retrieval solutions...we treat every item we handle just like the largest of shipping companies; with barcode based tracking technology and portable receipt printing by the drivers that bring information assets right to your door. Convert paper documents to digital using our leveraged resources or buy the software and/or hardware you need direct from RecordMax. And enjoy safe and secure document shredding services at competitive prices.

The resources and experience of our management team combined with hiring the best possible leaders for local customers assures confidence, consistency and quality from the people our customers have come to trust. With a growing number of locations around the Southeast, RecordMax stands ready to be a trusted part of your information management team.

You'll be glad you chose the people, the facilities and the business solutions at **RecordMax**.
