

***FOR IMMEDIATE RELEASE - RecordMax Acquires Data Management Archives of New Orleans***

July 1st, 2007 – Jackson, Mississippi and New Orleans, Louisiana

**RecordMax** announced the acquisition of the assets of Data Management Archives; a leading provider of records storage, data storage, document shredding, business information solutions, health information management, asset storage, fulfillment, project management and other business services for customers in Greater New Orleans.

“When we decided to take RecordMax into more of a regional player, we specifically targeted New Orleans as a market we wanted to serve” offered Jim Teske, president of **The RecordMax Companies**. “There is a very strong management presence that came with this addition to our family of commercial records centers. Add to that good business systems and a superior facility that passed the test of Katrina with flying colors...we couldn’t be more pleased.”

With a track record over the last 19 years of serving records management customers, General Manager Melanie Manale has seen and learned from every project and customer. Melanie has led the transition of every member of the Data Management Archives team accepting positions with RecordMax. Customers will therefore enjoy the same voices, faces and trusted relationships on top of the new added resources, services and complimentary presence of a market leader serving a number of other nearby cities.

Most assuredly the customers being served through Data Management Archives have enjoyed peace of mind and added confidence based on the level of protection provided throughout Katrina and its aftermath. No information assets under the company’s care were affected by moisture or the elements during Katrina. The building is outside the low lying areas of the city and offers the added flood avoidance protection that comes with our floor being an additional 4 ½ feet above ground level. Add the right fire/intrusion systems into the mix and its no wonder RecordMax secured long term use of these facilities (on top of acquiring the businesses assets).

**RecordMax New Orleans** is focused on a number of immediate priorities including enhanced communications with customers, introduction of new technologies for online management and handling of physical and electronic information, more active participation in data security and/or shredding services and offering complimentary business fulfillment solutions to current and prospective customers (via the storage and distribution of print media, forms and publications).

***About RecordMax***

**RecordMax** is an emerging leader in providing secure information storage and management services to law firms, hospitals, business professionals, government entities and other professional organizations. Our archival services range from the protection of business records, files, computer tapes and other sensitive media to digital storage of electronic documents, images, email and web content. Enjoy convenient and professional delivery and retrieval solutions...we treat every item we handle just like the largest of shipping companies; with barcode based tracking technology and portable receipt printing by the drivers that bring information assets right to your door.

The resources and experience of our management combined with hiring the best possible leaders for local customers assures confident, consistency and quality from people our customers have come to trust. With a growing number of locations around the Southeast, **RecordMax** stands ready to be a trusted part of your information management team.

You’ll be glad you chose the people, the facilities and the business solutions at **RecordMax**.
