

FOR IMMEDIATE RELEASE – RecordMax Joins Forces With Industry Leader Digitech Systems, Inc.

September 28th, 2007 – Jackson, Mississippi

The RecordMax Companies announced the signing of purchase and reseller agreements with **Digitech Systems, Inc.** of Greenwood Village, Colorado; whose systems range from a full featured, in-house document and content management system, PaperVision™ Enterprise, to a massive, hosted, off-site document and content management repository, ImageSiloSM.

The selection of Digitech Systems as a strategic technology partner for RecordMax was the result of a long and exhaustive search of leading software companies that specialize in electronic document and content management. Along with other technology solutions provided through the team of RecordMax professionals via a growing number of operations around the Southeast, the end result is a “best of brands” offering to customers.

“RecordMax was offering imaging solutions more than ten years ago in the Jackson marketplace. However our customers’ needs at the time seemed more geared toward storage of traditional hardcopy records” offered Jim Teske, President of **RecordMax USA**. “Everything we do is very customer focused and increasingly our customers are looking to more effectively manage information in electronic form. We worked very hard to evaluate every possible option for technology in the digital arena and Digitech Systems kept coming up on top.”

The new services available through the new Digitech partnership are expected to include file preparation, scanning, indexing, digital storage and workflow solutions provided by RecordMax personnel as well as resale, installation and training for software and scanning hardware within customer facilities. The initial installation is scheduled for October, 22nd in RecordMax’s flagship operation in Jackson, Mississippi. RecordMax not only has several pending customers but will automate some of its own internal processes with the new software from Digitech. An initial focus on healthcare, legal and financial applications includes managing release of patient information and workflow management of accounts payable needs.

Customers should expect a roll out of imaging, content management, workflow and expanded digital archiving to all current markets over the next 90 days or so.

About RecordMax

RecordMax is an emerging leader in providing secure information storage and management services to law firms, hospitals, business professionals, government entities and other professional organizations. Our archival services range from the protection of business records, files, computer tapes and other sensitive media to digital storage of electronic documents, images, email and web content.
