

Premium Media Storage and Computer Tape Containers

Molded Plastic Media Storage Cases

These containers are designed to accommodate many specific types of computer tapes or environmentally sensitive media and offer the following features to protect your data: double wall case which reduces G forces resulting from impact; molded dividers sized to the precise dimensions of each tape format cradle each cartridge and prevent shaking or rattling; trapped air space provides insulation from external temperature changes; use of foam only with tape and disk formats where plastic cases are employed protects media from contact with debris generating agents.

Metal Media Storage Containers

These containers are also designed to accommodate many specific types of computer tapes or environmentally sensitive media and are built of the strongest durable 16, 18 and 22 gauge metals; include full-width piano hinges; padlock eye; strong handles with rubber padding; specialized flame-retardant specialized foam protects media against shock/sudden impact; formed feet on bottom and recessed dimples on lid facilitate stacking; fuse-welded corners, joints, and seams give greater strength and durability and baked alkyd paint won't flake, is rust-resistant and available in many colors.
